

140. We reject NARUC's and the State Consumer Advocates' argument that we must, under section 254(k), require incumbent LECs to reallocate a portion of their joint and common loop costs from "universal services" as a group to wireline broadband Internet access transmission.⁴²⁹ The State Consumer Advocates submit a cost allocation proposal (which it characterizes as "market-driven") that differs from the current part 64 rules.⁴³⁰ BellSouth and SBC assert that cost allocations are not relevant under price cap regulation and that the Commission should reject the State Consumer Advocates' proposal.⁴³¹

141. We find that section 254(k) of the Act does not mandate allocation of interstate loop costs to non-common carrier broadband Internet access transmission. Under the *CALLS* access charge plan, the interstate loop costs of price cap carriers are not assigned to the different services that subscribers may receive over the loop, but are recovered directly from end users through the subscriber line charge. The Commission explicitly found that section 254(k) did not prohibit this cost recovery mechanism,⁴³² and the Fifth Circuit upheld this finding.⁴³³

142. The subscriber line charge is not itself a "service included in the definition of universal service." The interstate loop costs recovered through the subscriber line charge represent the costs of all jurisdictionally interstate uses of the loop. Since 1998, those uses have included both services supported by universal service, such as access to interexchange service, and broadband special access services, which are not supported by universal service. Costs need not be reallocated at this time from the subscriber line charge to non-common carrier, broadband Internet access transmission in order to prevent imposition of an unreasonable level of joint and common costs on services included in the definition of universal services. This is not, as State Consumer Advocates claim, unreasonable. Rather, it is a reasonable and rational cost allocation approach.⁴³⁴ We can take additional steps to address cost allocation issues in the future if the need arises.

143. We observe that NARUC and the State Consumer Advocates appear to assume that any reallocation of loop costs to broadband Internet access transmission would be given effect in the ratemaking process in such a way that consumers who do not receive wireline broadband Internet access service over their loops would have their tariffed rates reduced. This ratemaking approach would likely produce a relatively small per-line rate reduction for the large number of consumers who do not receive this broadband service, while leaving a larger per-line amount to be recovered from the smaller number of consumers who receive both narrowband and broadband services over their loops. This form of cost reallocation produces anomalous results, and we do not adopt it. It would cause a consumer who buys the

⁴²⁹ NARUC Comments at 12-13; State Consumer Advocates Comments at 24-25.

⁴³⁰ State Consumer Advocates Comments at 26. This proposal would require allocation to broadband Internet access of an amount of cost equal to the difference between the competitor's wholesale price and the incumbent LEC's incremental cost for broadband transmission service. *Id.* at 27.

⁴³¹ BellSouth Comments at 27-29; SBC Reply at 63-64.

⁴³² See *Access Charge Reform*, CC Docket Nos. 96-262 and 94-1, Sixth Report and Order, 15 FCC Rcd 12962, 12998-13001, paras. 91-97 (2000) (subsequent history omitted) (*CALLS Order*).

⁴³³ *Texas Office of Public Utility Counsel v. FCC*, 265 F.3d 313, 323-324 (5th Cir. 2001).

⁴³⁴ State Consumer Advocates argue that the need to assign costs among all services using the loop will become even more important as incumbent LEC networks are engineered to deliver a variety of integrated services. State Consumer Advocates Comments at 33-34. We conclude instead that as more services are offered over a single loop, cost allocations are likely to become more arbitrary and thus less reasonable.

two services over the same loop to pay much more for that facility than a consumer who buys only narrowband service, even though the cost of that facility is fixed and does not vary in proportion to usage. It would be possible to devise a scheme in which costs were reallocated only with respect to those loops on which both services are being provided, but this would seem to produce only a shifting of charges from one part of the customer's bill to another.

144. We note that the question whether there should be any changes to the jurisdictional allocation of loop costs in light of use of the loop for broadband services was referred to the Federal-State Joint Board on Separations in 1999.⁴³⁵ Specifically, in the wake of the Commission's determination in its 1999 tariff investigation that GTE's ADSL service was an interstate special access service subject to federal tariffing, NARUC filed a petition for clarification regarding the proper allocation under Part 36 of the Commission's rules of loop costs associated with DSL services.⁴³⁶ Noting that issues associated with how to allocate local loop plant between voice and data services for purposes of jurisdictional separations were beyond the scope of the limited investigation in the tariff proceeding, the Commission stated that it would address these important issues in conjunction with the Joint Board.⁴³⁷ This issue remains pending. In any event, separations is now subject to a five-year freeze, and the Joint Board is working on the approach that should follow this freeze; the issues we describe in this Order already fall within this context.⁴³⁸ After the Joint Board makes its recommendation, we can reexamine the question of how any additional costs that might be assigned to the interstate jurisdiction may be recovered by local exchange carriers.

VII. ENFORCEMENT

145. We intend to swiftly and vigorously enforce the terms of this Order. Significantly, through review of consumer complaints and other relevant information, we will monitor all consumer-related problems arising in this market and take appropriate enforcement action where necessary. Similarly, we will continue to monitor the interconnection⁴³⁹ and interoperability practices⁴⁴⁰ of all industry participants, including facilities-based Internet access providers, and reserve the ability to act under our ancillary authority in the event of a pattern of anti-competitive conduct.⁴⁴¹

VIII. NOTICE OF PROPOSED RULEMAKING

146. The broadband marketplace before us today is an emerging and rapidly changing one. Nevertheless, consumer protection remains a priority for the Commission. We have a duty to ensure that consumer protection objectives in the Act are met as the industry shifts from narrowband to broadband services. Through this *Notice*, we thus seek to develop a framework for consumer protection in the broadband age – a framework that ensures that consumer protection needs are met by *all* providers of

⁴³⁵ *GTE DSL Reconsideration Order*, 17 FCC Rcd at 27412, para. 9; *see also Jurisdictional Separations and Referred to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 16 FCC Rcd 11382, 11397-98, para. 31 (2001).

⁴³⁶ *GTE DSL Reconsideration Order*, 17 FCC Rcd at 27411, para. 7.

⁴³⁷ *Id.* at 27412, para. 9.

⁴³⁸ *See Jurisdictional Separations and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 16 FCC Rcd 11382 (2001).

⁴³⁹ 47 U.S.C. § 251(a).

⁴⁴⁰ 47 U.S.C. § 256.

⁴⁴¹ *See supra* n.339 (citing *NCTA v. Brand X*, slip op. at 25, regarding the Commission's Title I authority).

broadband Internet access service, regardless of the underlying technology.⁴⁴² This framework necessarily will be built on our ancillary jurisdiction under Title I; as we explain in the Order,⁴⁴³ this jurisdiction is ample to accomplish the consumer protection goals we identify below, and we will not hesitate to exercise it.⁴⁴⁴

147. For each of the specific areas of Commission regulation described below, we ask commenters to address whether the imposition of regulations pursuant to our ancillary jurisdiction, and the corresponding ability of consumers to take advantage of Commission avenues for resolution of consumer protection issues, is desirable and necessary as a matter of public policy, or whether we should rely on market forces to address some or all of the areas listed. Are these types of regulations more or less relevant in the context of broadband Internet access service than they are for traditional telephony services? We ask commenters to describe any technical, economic, or other impediments that may affect the ability of broadband Internet access service providers to comply with such regulations. Are there areas of consumer protection not listed above for which the Commission should impose regulations? If so, commenters should describe the nature of the concern and address the questions posed in this paragraph.

A. CPNI

148. Consumers' privacy needs are no less important when consumers communicate over and use broadband Internet access than when they rely on telecommunications services. For example, a consumer may have questions about whether a broadband Internet access service provider will treat his or her account and usage information as confidential, or whether the provider reserves the right to use account information for marketing and other purposes. Section 222 of the Act establishes the regulatory framework governing telecommunications carriers' use and disclosure of CPNI and other customer information obtained by those carriers in their "provision of a telecommunications service."⁴⁴⁵ That section requires, in general, that telecommunications carriers use or disclose CPNI only in the provision of the telecommunications service from which the CPNI is derived, or in the provision of services necessary to, or used in, the provision of such telecommunications services.⁴⁴⁶

149. We seek comment on whether we should extend privacy requirements similar to the Act's CPNI requirements to providers of broadband Internet access services. For example, should we adopt rules under our Title I authority that forbid broadband Internet access providers from disclosing, without their

⁴⁴² We note that questions regarding necessary regulatory obligations of cable modem providers have previously been raised in the *Cable Modem Declaratory Ruling and NPRM*, 17 FCC Rcd at 4848-54, paras. 96-112. To the extent that our inquiry here is duplicative of those questions, we ask commenters to refresh the record by filing comments in this instant proceeding in WC Docket No. 05-271.

⁴⁴³ See *supra* paras. 108-111.

⁴⁴⁴ Indeed, this Commission has already shown its willingness to rely on ancillary jurisdiction in the face of a demonstrated need. See *VoIP E911 Order* at paras. 26-32.

⁴⁴⁵ 47 U.S.C. § 222(c)(1) (emphasis added). The Commission has adopted rules implementing section 222, including rules defining the scope of the phrase "telecommunications service" in section 222(c)(1)(A) as well as rules specifying which services are included in the phrase "services necessary to, or used in the provision of telecommunications service" in section 222(c)(1)(B). See 47 C.F.R. §§ 64.2001-64.2008; see also *Implementation of the Telecommunications Act of 1996: Telecommunications Carriers' Use of Customer Proprietary Network Information and Other Customer Information*, CC Docket No. 96-115, Third Report and Order and Third Further Notice of Proposed Rulemaking, 17 FCC Rcd 14860 (2002) (*CPNI Remand Order*).

⁴⁴⁶ 47 U.S.C. § 222(c)(1).

customers' approval, information about their customers that they learn through the provision of their broadband Internet access service? We seek comment on what sort of customer proprietary information broadband Internet access providers possess, e.g., information about consumers' service plans, installed equipment, or patterns of Internet access use. We note that long before Congress enacted section 222 of the Act, the Commission had recognized the need for privacy requirements associated with the provision of enhanced services and had adopted CPNI-related requirements in conjunction with other *Computer Inquiry* obligations.⁴⁴⁷

B. Slamming

150. Section 258 of the Act prohibits telecommunications carriers from submitting or executing an unauthorized change in a subscriber's selection of a provider of telephone exchange service or telephone toll service, a practice commonly known as "slamming."⁴⁴⁸ In a series of orders, the Commission adopted various rules to implement section 258, and concluded that state authorities should have primary responsibility for administering the rules.⁴⁴⁹ By providing for state administration of slamming rules, the

⁴⁴⁷ See *Computer III Phase II Order*, 2 FCC Rcd at 3094-95, paras. 152-56 (1987). Specifically, in the *Computer III* proceeding, the Commission adopted a framework governing CPNI not only to protect independent enhanced service providers from anticompetitive use of customers' local and long distance services information gained by the dominant telephone service providers to advance their enhanced services provisioning, but also to protect legitimate customer expectations of confidentiality. Under the pre-1996 Act CPNI framework, which was eliminated in its entirety when the Commission implemented section 222, customer information derived from the provision of enhanced services was not subject to CPNI protections. See *Implementation of the Telecommunications Act of 1996: Telecommunications Carriers' Use of Customer Proprietary Network Information and Other Customer Information*, CC Docket No. 96-115, Second Report and Order and Further Notice of Proposed Rulemaking, 13 FCC Rcd 8061, 8184-93, paras. 176-89 (1998) (*CPNI Order*), on recon., 14 FCC Rcd 14409 (1999) (*CPNI Reconsideration Order*), vacated sub nom. *U.S. West v. FCC*, 182 F.3d 1224 (10th Cir. 1999), cert. denied, 530 U.S. 1213 (2000).

⁴⁴⁸ 47 U.S.C. § 258(a) (mandating that "[n]o telecommunications carrier shall submit or execute a change in a subscriber's selection of a provider of telephone exchange service or telephone toll service except in accordance with such verification procedures as the Commission shall prescribe"). Prior to the adoption of section 258 of the Act, the Commission had recognized that slamming was a significant problem, and had taken various steps to address the issue; the adoption of section 258 expanded the Commission's authority in this area. See, e.g., *Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers*, CC Docket No. 94-129, Report and Order, 10 FCC Rcd 9560 (1995), stayed in part, 11 FCC Rcd 856 (1995); *Policies and Rules Concerning Changing Long Distance Carriers*, CC Docket No. 91-64, Report and Order, 7 FCC Rcd 1038 (1992), recon. denied, 8 FCC Rcd 3215 (1993); *Investigation of Access and Divestiture Related Tariffs*, CC Docket No. 83-1145, Phase I, Memorandum Opinion and Order, 101 FCC 2d 935, recon., 102 FCC 2d 503 (1985); see also, e.g., *Cherry Communications*, File No. ENF-93-045, Order, 9 FCC Rcd 2086 (1994) (adopting consent decree enforcing the Commission's anti-slamming rules).

⁴⁴⁹ *Implementation of the Subscriber Carrier Selection Changes Provisions of the Telecommunications Act of 1996: Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers*, CC Docket No. 94-129, Second Report and Order and Further Notice of Proposed Rulemaking, 14 FCC Rcd 1508 (1998) (*Second Report and Order*), stayed in part, *MCI WorldCom v. FCC*, No. 99-1125 (D.C. Cir. May 18, 1999) (*Stay Order*), motion to dissolve stay granted, *MCI WorldCom v. FCC*, No. 99-1125 (D.C. Cir. June 27, 2000) (*Order Lifting Stay*); *Implementation of the Subscriber Carrier Selection Changes Provisions of the Telecommunications Act of 1996: Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers*, CC Docket No. 94-129, First Order on Reconsideration, 15 FCC Rcd 8158 (2000) (*First Reconsideration Order*); *Implementation of the Subscriber Carrier Selection Changes Provisions of the Telecommunications Act of 1996: Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers*, CC Docket No. 94-129, Third Report and Order and Second Order on Reconsideration, 15 FCC Rcd 15996 (2000) (*Third Report and Order*); Errata, DA 00-2163 (rel. Sept. 25, 2000); Erratum, DA 00-292 (rel. Oct. 4, 2000); *Implementation of the* (continued . . .)

Commission recognized that state authorities are particularly well-equipped to handle such complaints because states are close to consumers and are familiar with trends in their regions.⁴⁵⁰ The Commission also recognized, however, that all states may not have the resources available to handle slamming complaints.⁴⁵¹ Accordingly, the Commission's rules allow consumers in states that do not "opt-in" to administer the slamming rules to file slamming complaints with the Commission.⁴⁵²

151. We seek comment on whether we should exercise our Title I authority to impose similar requirements on providers of broadband Internet access service. Commenters should explain in what circumstances subscribers to broadband Internet access could get "slammed."⁴⁵³ Is the provisioning process for broadband Internet access service such that an unauthorized change in provider is more likely in situations where the provider relies on third-party broadband transmission facilities?

C. Truth-in-Billing

152. The Commission has adopted truth-in-billing rules to ensure that consumers receive accurate, meaningful information on their telecommunications bills that will allow consumers to better understand their bills, compare service offerings, and thereby promote a more efficient, competitive marketplace.⁴⁵⁴ In general, the Commission's rules require that a telecommunication carrier's bill must: (1) be accompanied by a brief, clear, non-misleading, plain language description of the service or services rendered; (2) identify the service provider associated with each charge; (3) clearly and conspicuously identify any change in service provider; (4) identify those charges for which failure to pay will not result in disconnection of basic local service; and (5) provide a toll-free number for consumers to inquire or dispute any charges.⁴⁵⁵ The Commission's rules on truth-in-billing are designed to reduce slamming,⁴⁵⁶

(continued from previous page)

Subscriber Carrier Selection Changes Provisions of the Telecommunications Act of 1996, Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers, CC Docket No. 94-129, Order, 16 FCC Rcd 4999 (2001); *Implementation of the Subscriber Carrier Selection Changes Provisions of the Telecommunications Act of 1996, Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers*, CC Docket No. 94-129, Third Order on Reconsideration and Second Further Notice of Proposed Rule Making, 18 FCC Rcd 5099 (2003) (*Third Reconsideration Order* and/or *Second FNPRM*). The rules adopted by the Commission to implement section 258 are codified in part 64. See 47 C.F.R. §§ 64.1100 *et seq.*

⁴⁵⁰ *First Reconsideration Order*, 15 FCC Rcd at 8169-80, paras. 22-43.

⁴⁵¹ *Id.* at 8165-66, paras. 25-28.

⁴⁵² *Id.*

⁴⁵³ Typically, in order to subscribe to broadband Internet access service, a consumer must install, or have installed, equipment (*i.e.*, a modem that the ISP provides to the consumer and that is specific to that ISP) that, along with a proprietary password, enables the consumer to utilize that particular ISP's Internet access service. We therefore seek comment on whether, given the manner in which broadband Internet access service is provisioned, slamming could actually occur from a technical perspective.

⁴⁵⁴ See 47 C.F.R. §§ 64.2400-2401.

⁴⁵⁵ 47 C.F.R. § 64.2401.

⁴⁵⁶ See *supra* Part VIII.B.

cramming,⁴⁵⁷ and other telecommunications fraud by setting standards for accuracy on bills for telecommunications service.⁴⁵⁸

153. We seek comment on whether we should exercise our Title I authority to impose requirements on broadband Internet access service providers that are similar to our truth-in-billing requirements or are otherwise geared toward reducing slamming, cramming, or other types of telecommunications-related fraud. For example, during 2005, the Commission's Consumer and Governmental Affairs Bureau has received complaints about the billing practices of broadband Internet access services providers, including complaints related to double billing, billing for unexplained charges, and billing for cancelled services.⁴⁵⁹ Overall, parties should explain what problems customers of broadband Internet access service are likely to have with their bills and whether we should address these problems through truth-in-billing-type requirements.

D. Network Outage Reporting

154. The Commission requires certain communications providers to notify the Commission of outages of thirty or more minutes that affect a substantial number of customers or involve major airports, major military installations, key government facilities, nuclear power plants, or 911 facilities.⁴⁶⁰ We seek comment on whether we should exercise our Title I authority to impose any similar requirements on broadband Internet access service providers. Do the purposes of our network outage reporting requirements apply to outages of broadband Internet access service? Should we adopt requirements that differ depending on the nature of the facility or the type of customer served?

E. Section 214 Discontinuance

155. Section 214 of the Act limits a telecommunications carrier's ability to discontinue unilaterally its service to customers.⁴⁶¹ The Commission's implementing rules generally require that domestic carriers wishing to "discontinue, reduce, or impair" services must first request authority to do so from the Commission⁴⁶² and must notify affected customers and others of their plans.⁴⁶³

⁴⁵⁷ "Cramming" is the practice of placing unauthorized, misleading, or deceptive charges on a telecommunications bill. Cramming is most likely to occur when a carrier does not clearly or accurately describe all of the relevant charges on the consumer's bill.

⁴⁵⁸ See 47 C.F.R. § 64.2400(a).

⁴⁵⁹ Operations Support for Complaint Analysis and Resolution (OSCAR) System, Consumer & Governmental Affairs Bureau (Aug. 4, 2005).

⁴⁶⁰ 47 C.F.R. § 63.100(a)-(e); see also *New Part 4 of the Commission's Rules Concerning Disruptions to Communications*, ET Docket No. 04-35, Report and Order and Further Notice of Proposed Rulemaking, 19 FCC Rcd 16830, 16867, para. 65 (2004).

⁴⁶¹ 47 U.S.C. § 214(a). Part 63 of the Commission's rules implements this section of the Act, establishing comprehensive rules with which telecommunications carriers must comply in seeking to discontinue telecommunications services. These rules vary depending on whether the carrier in question is a dominant or non-dominant provider of the telecommunications services it is seeking to discontinue. See 47 C.F.R. §§ 63.60 *et seq.*

⁴⁶² 47 U.S.C. § 63.71.

⁴⁶³ 47 U.S.C. § 63.71(a).

156. We seek comment on whether we should exercise our Title I authority to impose discontinuance-type requirements on providers of broadband Internet access service. As customers grow more dependent on broadband Internet access services, does the need for notice to customers grow stronger?⁴⁶⁴ Or do the multiplicity and availability of broadband Internet access providers mitigate the need for such notice?

F. Section 254(g) Rate Averaging Requirements

157. Finally, we seek to ensure that our actions today do not jeopardize the policies of section 254(g). That section required the Commission to adopt rules “to require that the rates charged by providers of interexchange telecommunications services to subscribers in rural and high cost areas . . . be no higher than the rates charged by each such provider to its subscribers in urban areas.”⁴⁶⁵ The provision further required that the rules “require that a provider of interstate interexchange telecommunications services . . . provide such services to its subscribers in each State at rates no higher than the rates charged to its subscribers in any other State.”⁴⁶⁶ The Commission has forborne from the requirements of section 254(g) with regard to private line services, of which DSL is one.⁴⁶⁷ Because the policies underlying section 254(g) remain important, however, we ask whether we should exercise our Title I authority to impose any similar requirements on providers of broadband Internet access services, particularly as consumers substitute broadband services and applications for narrowband services that were covered by section 254(g).

G. Federal and State Involvement

158. We recognize that the states play an important role in ensuring that public safety and consumer protection goals are met. The Commission has recently announced the creation of a federal-state task force on VoIP E911 enforcement,⁴⁶⁸ and we believe that this *Notice* may give rise to additional areas in which cooperation between this Commission and the states can achieve the best results. We note in this regard that NARUC has recently advocated for a “functional” approach to questions of federal and state jurisdiction, particularly with respect to consumer protection issues.⁴⁶⁹ For example, with respect to CPNI, NARUC recommends that the Commission be primarily responsible for establishing rules, while state or local authorities assume responsibility for enforcing those rules.⁴⁷⁰ To the extent that the

⁴⁶⁴ For example, in 2001, a large provider of broadband Internet access services, @Home, sought bankruptcy court protection and announced plans to sell its high-speed network. Within a relatively brief period of time, the company requested and received permission from the United States Bankruptcy Court to shut down its network, causing its subscribers to switch to other providers. News reports described the many problems the subscribers encountered during the transition, including service outages, inadequate customer support, and loss of high-speed access. See Bill Bergstrom, *Comcast Fields Internet Complaints*, Tallahassee Democrat, Jan. 9, 2002; Bill Bergstrom, *Internet Switch Problems Annoy Comcast Customers*, Fort Wayne Journal-Gazette, Jan. 7, 2002.

⁴⁶⁵ 47 U.S.C. § 254(g).

⁴⁶⁶ *Id.*

⁴⁶⁷ See *Policy and Rules Concerning the Interstate, Interexchange Marketplace*, Report and Order, 11 FCC Rcd 9564, 9577, para. 27 (1996) (forbearing from application of section 254(g) “to the extent necessary to permit carriers to depart from geographic rate averaging to offer . . . private line services”).

⁴⁶⁸ See, e.g., *FCC Announces Joint Federal/State VoIP Enhanced 911 Enforcement Task Force*, Press Release, 2005 Westlaw 1750445 (July 25, 2005).

⁴⁶⁹ See generally *NARUC Legislative Task Force Report on Federalism and Telecom* (July 2005).

⁴⁷⁰ See *id.* at 8.

Commission finds it necessary to impose consumer protection and related regulations on broadband Internet access service providers, we seek comment on how best to harmonize federal regulations with the states' efforts and expertise in these areas. Do commenters support NARUC's functional approach? In what other ways can the federal and state governments cooperate in order to ensure the best results for consumers?

H. Consumer Options for Enforcement

159. We note that consumers have various methods of pursuing complaints with the Commission against entities subject to our jurisdiction. In particular, the Commission's informal complaint process permits consumers to submit complaints to the Commission by any reasonable means, including by telephone, facsimile, postal mail, email and an Internet complaint form. Consumer Center representatives, known as Consumer Advocacy and Mediation Specialists or CAMSs, are available to assist consumers in filing complaints if needed. CAMSs staff review complaints for subject matter content and determine appropriate handling of the complaints.

IX. PROCEDURAL MATTERS

A. Final Paperwork Reduction Act Analysis

160. This Report and Order does not contain any information collection subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. In addition, therefore, it does not contain any new or modified "information collection burden for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, *see* 44 U.S.C. § 3506(c)(4).

B. Regulatory Flexibility

161. As required by the Regulatory Flexibility Act, *see* 5 U.S.C. § 603, the Commission has prepared a Final Regulatory Flexibility Certification of the possible significant economic impact on small entities of the policies and rules addressed in this Report and Order. This certification is set forth in Appendix B.

162. As required by the Regulatory Flexibility Act, 5 U.S.C. § 603, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities of the policies and rules addressed in this Notice of Proposed Rulemaking. The IRFA is set forth in Appendix B. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments filed in response to this Notice of Proposed Rulemaking and must have a separate and distinct heading designating them as responses to the IRFA.

C. Other Procedural Matters

1. Ex Parte Presentations

163. The rulemaking this Notice initiates shall be treated as a "permit-but-disclose" proceeding in accordance with the Commission's *ex parte* rules.⁴⁷¹ Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentations must contain summaries of the substance of the presentations and not merely a listing of the subjects discussed. More than a one or two sentence

⁴⁷¹ 47 C.F.R. §§ 1.200 *et seq.*

description of the views and arguments presented is generally required.⁴⁷² Other requirements pertaining to oral and written presentations are set forth in section 1.1206(b) of the Commission's rules.

2. Comment Filing Procedures

164. Pursuant to sections 1.415 and 1.419 of the Commission's rules, 47 C.F.R §§ 1.415, 1.419, interested parties may file comments and reply comments regarding the Notice of Proposed Rulemaking on or before the dates indicated on the first page of this document. **All filings related to this Notice of Proposed Rulemaking should refer to WC Docket No. 05-271 and need not reference the other docket numbers appearing in the caption to this document.** Comments may be filed using: (1) the Commission's Electronic Comment Filing System (ECFS), (2) the Federal Government's eRulemaking Portal, or (3) by filing paper copies. See Electronic Filing of Documents in Rulemaking Proceedings, 63 FR 24121 (1998).

- **Electronic Filers:** Comments may be filed electronically using the Internet by accessing the ECFS: <http://www.fcc.gov/cgb/ecfs/> or the Federal eRulemaking Portal: <http://www.regulations.gov>. Filers should follow the instructions provided on the website for submitting comments.
- **ECFS filers** must transmit one electronic copy of the comments for WC Docket No. 05-271. In completing the transmittal screen, filers should include their full name, U.S. Postal Service mailing address, and the applicable docket number. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions, filers should send an e-mail to ecfs@fcc.gov, and include the following words in the body of the message, "get form." A sample form and directions will be sent in response.
- **Paper Filers:** Parties who choose to file by paper must file an original and four copies of each filing. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail (although we continue to experience delays in receiving U.S. Postal Service mail). All filings must be addressed to the Commission's Secretary, Marlene H. Dortch, Office of the Secretary, Federal Communications Commission, 445 12th Street, S.W., Washington, D.C. 20554.
- The Commission's contractor will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, N.E., Suite 110, Washington, D.C. 20002. The filing hours at this location are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, Md. 20743.
- U.S. Postal Service first-class, Express, and Priority mail should be addressed to 445 12th Street, S.W., Washington D.C. 20554.

165. Parties should send a copy of their filings to Janice Myles, Competition Policy Division, Wireline Competition Bureau, Federal Communications Commission, Room 5-C140, 445 12th Street, S.W.,

⁴⁷² See 47 C.F.R. § 1.1206(b)(2).

Washington, D.C. 20554, or by e-mail to janice.myles@fcc.gov. Parties shall also serve one copy with the Commission's copy contractor, Best Copy and Printing, Inc. (BCPI), Portals II, 445 12th Street, S.W., Room CY-B402, Washington, D.C. 20554, (202) 488-5300, or via e-mail to fcc@bcpiweb.com.

166. Documents in WC Docket No. 05-271 will be available for public inspection and copying during business hours at the FCC Reference Information Center, Portals II, 445 12th Street S.W., Room CY-A257, Washington, D.C. 20554. The documents may also be purchased from BCPI, telephone (202) 488-5300, facsimile (202) 488-5563, TTY (202) 488-5562, e-mail fcc@bcpiweb.com.

3. Accessible Formats

167. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice) or 202-418-0432 (TTY). Contact the FCC to request reasonable accommodations for filing comments (accessible format documents, sign language interpreters, CART, etc.) by e-mail: FCC504@fcc.gov; phone: 202-418-0530 or TTY: 202-418-0432.

X. ORDERING CLAUSES

168. Accordingly, IT IS ORDERED that, pursuant to Sections 1-4, 10, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151-154, 160, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r), and Section 706 of the Telecommunications Act of 1996, 47 U.S.C. § 157 nt, the Report and Order and Notice of Proposed Rulemaking ARE ADOPTED.

169. IT IS FURTHER ORDERED, pursuant to Sections 1-4, 10, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151-154, 160, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r), and Section 706 of the Telecommunications Act of 1996, 47 U.S.C. § 157 nt, that wireline broadband Internet access transmission providers ARE GRANTED blanket certification to discontinue the provision of common carrier broadband Internet access transmission services to existing customers as set forth and subject to the conditions stated in this Order.

170. IT IS FURTHER ORDERED, pursuant to Sections 1-4, 10, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151-154, 160, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r), and Section 706 of the Telecommunications Act of 1996, 47 U.S.C. § 157 nt, that the Conditional Petition for Forbearance Under 47 U.S.C. § 160(c) filed by the Verizon Telephone Companies in WC Docket No. 04-242 on June 28, 2004, IS DENIED AS MOOT.

171. IT IS FURTHER ORDERED, pursuant to Sections 1-4, 10, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151-154, 160, 201-205, 214, 222, 225, 251, 252, 254-256, 258, 303(r), and Section 706 of the Telecommunications Act of 1996, 47 U.S.C. § 157 nt, that the Petition for Declaratory Ruling or, Alternatively, for Interim Waiver filed in WC Docket No. 04-242 by the Verizon Telephone Companies on June 28, 2004, IS DISMISSED AS MOOT.

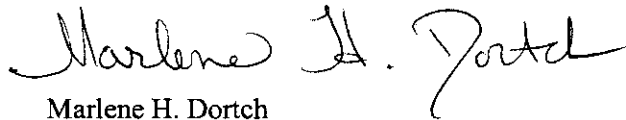

172. IT IS FURTHER ORDERED, pursuant to sections 1.103(a) and 1.427(b) of the Commission's rules, 47 C.F.R. §§ 1.103(a), 1.427(b), that this Report and Order SHALL BE EFFECTIVE 30 days after publication of the Report and Order in the FEDERAL REGISTER.

173. IT IS FURTHER ORDERED that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, SHALL SEND a copy of this Order, including the Final

Regulatory Flexibility Certification, to the Chief Counsel for Advocacy of the Small Business Administration.

174. IT IS FURTHER ORDERED that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, SHALL SEND a copy of this Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.⁴⁷³

APPENDIX B REGULATORY FLEXIBILITY ANALYSES

I. FINAL REGULATORY FLEXIBILITY CERTIFICATION

1. The Regulatory Flexibility Act of 1980, as amended (RFA),¹ requires that a regulatory flexibility analysis be prepared for notice-and-comment rulemaking proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities."² The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."³ In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act.⁴ A "small business concern" is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).⁵

2. In the *Wireline Broadband NPRM*, the Commission sought comment generally on the appropriate statutory classification for wireline broadband Internet access service provided over a provider's own facilities, and on what regulatory requirements, if any, should be imposed on the telecommunications component of wireline broadband Internet access service.⁶ Specifically, the Commission sought comment on whether the *Computer Inquiry* requirements should be modified or eliminated as applied to self-provisioned wireline broadband Internet access service, as well as how the Commission's tentative conclusion that wireline broadband Internet access service is an information service would affect the CALEA assistance capabilities, the USA PATRIOT Act, other national security or emergency preparedness obligations, network reliability and interoperability, and existing consumer protection requirements, such as section 214 of the Act, CPNI requirements under section 222 of the Act, and requirements for access to persons with disabilities under section 255 of the Act.⁷ The Commission also sought comment on how to continue to meet the goals of universal service under section 254 of the Act in a marketplace where competing providers are deploying broadband Internet access, including how the regulatory status of wireline broadband Internet access could impact the system of assessments and contributions to universal service.⁸ Finally, the *Wireline Broadband NPRM* also invited comment on the

¹ See 5 U.S.C. § 603. The RFA, see 5 U.S.C. §§ 601-12, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Pub. L. No. 104-121, Title II, 110 Stat. 857 (1996).

² 5 U.S.C. § 605(b).

³ 5 U.S.C. § 601(6).

⁴ 5 U.S.C. § 601(3) (incorporating by reference the definition of "small-business concern" in the Small Business Act, 15 U.S.C. § 632). Pursuant to 5 U.S.C. § 601(3), the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the Federal Register."

⁵ 15 U.S.C. § 632.

⁶ *Wireline Broadband NPRM*, 17 FCC Rcd at 3029-48, paras. 17-64.

⁷ *Id.* at 3035-47, paras. 30-61.

⁸ *Id.* at 3043-54, paras. 54-78.

relationship between the statutory classification of wireline broadband Internet access service and an incumbent LEC's obligation to provide access to UNEs under sections 251 and 252.⁹

3. The Order eliminates the *Computer Inquiry* requirements on facilities-based carriers in their provision of wireline broadband Internet access service. Consequently, BOCs are immediately relieved of the separate subsidiary, CEI, and ONA obligations with respect to wireline broadband Internet access services. In addition, subject to a one-year transition period for existing wireline broadband transmission services, all wireline broadband Internet access service providers are no longer subject to the *Computer II* requirement to separate out the underlying transmission from wireline broadband Internet access service and offer it on a common carrier basis. We determine in this Order that wireline broadband Internet access service is an information service, as that term is defined in the statute. To the extent that the regulatory obligations discussed above apply to the transmission component of wireline broadband Internet access service when provided to ISPs or others on a stand-alone common carrier basis, these obligations will continue to apply when carriers offer broadband Internet access service transmission on a common carrier basis, both during the transition and thereafter.

4. The rule changes adopted in this Order apply, for the most part, only to BOCs (*Computer Inquiry* separate subsidiary, CEI, and ONA obligations with respect to wireline broadband Internet access services). In addition, all facilities-based wireline broadband Internet access service providers are no longer subject to the *Computer II* requirement to separate out the underlying transmission. Neither the Commission nor the SBA has developed a small business size standard specifically applicable to providers of incumbent local exchange service and interexchange services. The closest applicable size standard under the SBA rules is for Wired Telecommunications Carriers.¹⁰ This provides that such a carrier is small entity if it employs no more than 1,500 employees.¹¹ None of the four BOCs that would be affected by amendment of these rules meets this standard. To the extent that any other wireline provider would be classified as a small entity, it would not be negatively affected by the regulatory relief we grant in this Order.

5. Therefore, we certify that the requirements of the Order will not have a significant economic impact on a substantial number of small entities. We note that one party, Teletruth, filed comments in response to the IFRA in the *Wireline Broadband and Incumbent LEC Broadband* proceedings. Teletruth argues that these IFRA are deficient because they fail to assess the potential impact of the actions proposed in those proceedings on small ISPs and small competitive LECs and that our implementation of the RFA is otherwise deficient.¹² These arguments are identical to, and indeed filed as part of the same pleading as, arguments the Commission previously has rejected.¹³ We therefore again reject these arguments for the reasons stated in our prior Orders responding to TeleTruth's comments.¹⁴

⁹ *Id.* at 3047, para. 61.

¹¹ *Id.*

¹² See TeleTruth Comments *passim*.

¹³ See TeleTruth Comments *passim*.

¹⁴ See TeleTruth Comments *passim*.

6. The Commission will send a copy of the Order, including a copy of this Final Regulatory Flexibility Certification, in a report to Congress pursuant to the Congressional Review Act.¹⁵ In addition, the Order and this final certification will be sent to the Chief Counsel for Advocacy of the SBA, and a summary of the Order and final certification will be published in the Federal Register.¹⁶

II. INITIAL REGULATORY FLEXIBILITY ANALYSIS

7. As required by the Regulatory Flexibility Act of 1980, as amended (RFA),¹⁷ the Commission has prepared the present Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities that might result from this *Notice*. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the *Notice* provided above. The Commission will send a copy of the *Notice*, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.¹⁸ In addition, the *Notice* and IRFA (or summaries thereof) will be published in the Federal Register.¹⁹

A. Need for, and Objectives of, the Proposed Rules

8. The broadband marketplace before us today is an emerging and rapidly changing one. Nevertheless, consumer protection remains a priority for the Commission. We initiate this rulemaking to ensure that consumer protection objectives in the Act are met as the industry shifts from narrowband to broadband services. Through this *Notice*, the Commission's objective is to develop a framework for consumer protection in the broadband age – a framework that ensures that consumer protection needs are met by all providers of broadband Internet access service, regardless of the underlying technology.²⁰ The *Notice* seeks comment on whether the Commission should impose, for example, privacy requirements similar to the Act's CPNI requirements, slamming, truth-in-billing, network outage reporting, section 214 discontinuance, or section 254(g) rate averaging requirements on providers of broadband Internet access service. We also seek comment on how best to harmonize federal regulations with the states' efforts and expertise in consumer protection issues.

B. Legal Basis

9. The legal basis for any action that may be taken pursuant to the *Notice* is contained in sections 1-4, 201-205, 251, 252, 254, 256, 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151-154, 201-205, 251, 252, 254, 256, 303(r), and Section 706 of the Telecommunications Act of 1996, 47 U.S.C. § 157 nt.

¹⁵ See 5 U.S.C. § 801(a)(1)(A).

¹⁶ See 5 U.S.C. § 605(b).

¹⁷ See 5 U.S.C. § 603. The RFA, see 5 U.S.C. §§ 601-12, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Pub. L. No. 104-121, 110 Stat. 857 (1996).

¹⁸ See 5 U.S.C. § 603(a).

¹⁹ See 5 U.S.C. § 603(a).

²⁰ See *supra* *Notice* at para. 146.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules May Apply

10. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules.²¹ The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."²² In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act.²³ A small business concern is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).²⁴

11. *Small Businesses.* Nationwide, there are a total of approximately 22.4 million small businesses, according to SBA data.²⁵

12. *Small Organizations.* Nationwide, there are approximately 1.6 million small organizations.²⁶

13. *Small Governmental Jurisdictions.* The term "small governmental jurisdiction" is defined as "governments of cities, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand."²⁷ As of 1997, there were approximately 87,453 governmental jurisdictions in the United States.²⁸ This number includes 39,044 county governments, municipalities, and townships, of which 37,546 (approximately 96.2%) have populations of fewer than 50,000, and of which 1,498 have populations of 50,000 or more. Thus, we estimate the number of small governmental jurisdictions overall to be 84,098 or fewer.

14. We note that the list of potentially affected entities below is perhaps more expansive than is necessary. We have, for instance, included services that are apparently currently not a part of the Internet industry, as well as manufacturers.

²¹ 5 U.S.C. §§ 603(b)(3), 604(a)(3).

²² 5 U.S.C. § 601(6).

²³ 5 U.S.C. § 601(3) (incorporating by reference the definition of "small business concern" in the Small Business Act, 15 U.S.C. § 632). Pursuant to 5 U.S.C. § 601(3), the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such terms which are appropriate to the activities of the agency and publishes such definitions(s) in the Federal Register."

²⁴ 15 U.S.C. § 632.

²⁷ 5 U.S.C. § 601(5).

²⁸ U.S. Census Bureau, Statistical Abstract of the United States: 2000, Section 9, pages 299-300, Tables 490 and 492.

1. Telecommunications Service Entities

a. Wireline Carriers and Service Providers

15. We have included small incumbent local exchange carriers in this present RFA analysis. As noted above, a “small business” under the RFA is one that, *inter alia*, meets the pertinent small business size standard (e.g., a telephone communications business having 1,500 or fewer employees), and “is not dominant in its field of operation.”²⁹ The SBA’s Office of Advocacy contends that, for RFA purposes, small incumbent local exchange carriers are not dominant in their field of operation because any such dominance is not “national” in scope.³⁰ We have therefore included small incumbent local exchange carriers in this RFA analysis, although we emphasize that this RFA action has no effect on Commission analyses and determinations in other, non-RFA contexts.

1. *Incumbent Local Exchange Carriers (LECs)*. Neither the Commission nor the SBA has developed a small business size standard specifically for incumbent local exchange services. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.³¹ According to Commission data,³² 1,303 carriers have reported that they are engaged in the provision of incumbent local exchange services. Of these 1,303 carriers, an estimated 1,020 have 1,500 or fewer employees and 283 have more than 1,500 employees. Consequently, the Commission estimates that most providers of incumbent local exchange service are small businesses that may be affected by our action. In addition, limited preliminary census data for 2002 indicate that the total number of wired communications carriers increased approximately 34 percent from 1997 to 2002.³³

16. *Competitive Local Exchange Carriers, Competitive Access Providers (CAPs), “Shared-Tenant Service Providers,” and “Other Local Service Providers.”* Neither the Commission nor the SBA has developed a small business size standard specifically for these service providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.³⁴ According to Commission data,³⁵

²⁹ 15 U.S.C. § 632.

³⁰ Letter from Jere W. Glover, Chief Counsel for Advocacy, SBA, to William E. Kennard, Chairman, FCC (May 27, 1999). The Small Business Act contains a definition of “small-business concern,” which the RFA incorporates into its own definition of “small business.” See 15 U.S.C. § 632(a) (Small Business Act); 5 U.S.C. § 601(3) (RFA). SBA regulations interpret “small business concern” to include the concept of dominance on a national basis. See 13 C.F.R. § 121.102(b).

³¹ 13 C.F.R. § 121.201, NAICS code 517110 (changed from 513310 in Oct. 2002).

³² FCC, Wireline Competition Bureau, Industry Analysis and Technology Division, “Trends in Telephone Service” at Table 5.3, page 5-5 (June 2004) (“Trends in Telephone Service”). This source uses data that are current as of October 1, 2004.

³³ See U.S. Census Bureau, 2002 Economic Census, Industry Series: “Information,” Table 2, Comparative Statistics for the United States (1997 NAICS Basis): 2002 and 1997, NAICS code 513310 (issued Nov. 2004). The preliminary data indicate that the total number of “establishments” increased from 20,815 to 27,891. In this context, the number of establishments is a less helpful indicator of small business prevalence than is the number of “firms,” because the latter number takes into account the concept of common ownership or control. The more helpful 2002 census data on firms, including employment and receipts numbers, will be issued in late 2005.

³⁴ 13 C.F.R. § 121.201, NAICS code 517110 (changed from 513310 in Oct. 2002).

769 carriers have reported that they are engaged in the provision of either competitive access provider services or competitive local exchange carrier services. Of these 769 carriers, an estimated 676 have 1,500 or fewer employees and 93 have more than 1,500 employees. In addition, 12 carriers have reported that they are "Shared-Tenant Service Providers," and all 12 are estimated to have 1,500 or fewer employees. In addition, 39 carriers have reported that they are "Other Local Service Providers." Of the 39, an estimated 38 have 1,500 or fewer employees and one has more than 1,500 employees. Consequently, the Commission estimates that most providers of competitive local exchange service, competitive access providers, "Shared-Tenant Service Providers," and "Other Local Service Providers" are small entities that may be affected by our action. In addition, limited preliminary census data for 2002 indicate that the total number of wired communications carriers increased approximately 34 percent from 1997 to 2002.³⁶

17. *Local Resellers.* The SBA has developed a small business size standard for the category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.³⁷ According to Commission data,³⁸ 143 carriers have reported that they are engaged in the provision of local resale services. Of these, an estimated 141 have 1,500 or fewer employees and two have more than 1,500 employees. Consequently, the Commission estimates that the majority of local resellers are small entities that may be affected by our action.

18. *Toll Resellers.* The SBA has developed a small business size standard for the category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.³⁹ According to Commission data,⁴⁰ 770 carriers have reported that they are engaged in the provision of toll resale services. Of these, an estimated 747 have 1,500 or fewer employees and 23 have more than 1,500 employees. Consequently, the Commission estimates that the majority of toll resellers are small entities that may be affected by our action.

19. *Payphone Service Providers (PSPs).* Neither the Commission nor the SBA has developed a small business size standard specifically for payphone services providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁴¹ According to Commission data,⁴² 654 carriers have reported that they are engaged in the provision of payphone services. Of these, an estimated 652 have 1,500 or fewer employees and two have more than 1,500 employees. Consequently, the Commission estimates that the majority of payphone service providers are small entities that may be affected by our

action. In addition, limited preliminary census data for 2002 indicate that the total number of wired communications carriers increased approximately 34 percent from 1997 to 2002.⁴³

20. *Interexchange Carriers (IXCs)*. Neither the Commission nor the SBA has developed a small business size standard specifically for providers of interexchange services. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁴⁴ According to Commission data,⁴⁵ 316 carriers have reported that they are engaged in the provision of interexchange service. Of these, an estimated 292 have 1,500 or fewer employees and 24 have more than 1,500 employees. Consequently, the Commission estimates that the majority of IXCs are small entities that may be affected by our action. In addition, limited preliminary census data for 2002 indicate that the total number of wired communications carriers increased approximately 34 percent from 1997 to 2002.⁴⁶

21. *Operator Service Providers (OSPs)*. Neither the Commission nor the SBA has developed a small business size standard specifically for operator service providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁴⁷ According to Commission data,⁴⁸ 23 carriers have reported that they are engaged in the provision of operator services. Of these, an estimated 20 have 1,500 or fewer employees and three have more than 1,500 employees. Consequently, the Commission estimates that the majority of OSPs are small entities that may be affected by our action. In addition, limited preliminary census data for 2002 indicate that the total number of wired communications carriers increased approximately 34 percent from 1997 to 2002.⁴⁹

22. *Prepaid Calling Card Providers*. Neither the Commission nor the SBA has developed a small business size standard specifically for prepaid calling card providers. The appropriate size standard under SBA rules is for the category Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁵⁰ According to Commission data,⁵¹ 89 carriers have reported that they are engaged in the provision of prepaid calling cards. Of these, 88 are estimated to have 1,500 or fewer employees and one has more than 1,500 employees. Consequently, the Commission estimates that all or the majority of prepaid calling card providers are small entities that may be affected by our action.

23. *800 and 800-Like Service Subscribers*.⁵² Neither the Commission nor the SBA has developed a small business size standard specifically for 800 and 800-like service ("toll free") subscribers. The

⁵² We include all toll-free number subscribers in this category, including those for 888 numbers.

appropriate size standard under SBA rules is for the category Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.⁵³ The most reliable source of information regarding the number of these service subscribers appears to be data the Commission collects on the 800, 888, and 877 numbers in use.⁵⁴ According to our data, at the end of January, 1999, the number of 800 numbers assigned was 7,692,955; the number of 888 numbers assigned was 7,706,393; and the number of 877 numbers assigned was 1,946,538. We do not have data specifying the number of these subscribers that are not independently owned and operated or have more than 1,500 employees, and thus are unable at this time to estimate with greater precision the number of toll free subscribers that would qualify as small businesses under the SBA size standard. Consequently, we estimate that there are 7,692,955 or fewer small entity 800 subscribers; 7,706,393 or fewer small entity 888 subscribers; and 1,946,538 or fewer small entity 877 subscribers.

b. International Service Providers

24. The Commission has not developed a small business size standard specifically for providers of international service. The appropriate size standards under SBA rules are for the two broad categories of Satellite Telecommunications and Other Telecommunications. Under both categories, such a business is small if it has \$12.5 million or less in average annual receipts.⁵⁵ For the first category of Satellite Telecommunications, Census Bureau data for 1997 show that there were a total of 324 firms that operated for the entire year.⁵⁶ Of this total, 273 firms had annual receipts of under \$10 million, and an additional 24 firms had receipts of \$10 million to \$24,999,999. Thus, the majority of Satellite Telecommunications firms can be considered small.

25. The second category – Other Telecommunications – includes “establishments primarily engaged in . . . providing satellite terminal stations and associated facilities operationally connected with one or more terrestrial communications systems and capable of transmitting telecommunications to or receiving telecommunications from satellite systems.”⁵⁷ According to Census Bureau data for 1997, there were 439 firms in this category that operated for the entire year.⁵⁸ Of this total, 424 firms had annual receipts of \$5 million to \$9,999,999 and an additional six firms had annual receipts of \$10 million to \$24,999,999. Thus, under this second size standard, the majority of firms can be considered small.

c. Wireless Telecommunications Service Providers

26. Below, for those services subject to auctions, we note that, as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Also, the Commission does not generally track
